Abhay Gadhvi

Full Stack Developer | 2+ years of experience

Ahmedabad, Gujarat, India | +91 9099480268 | gadhviabhay11@gmail.com | LinkedIn | GitHub | Portfolio

EXPERIENCE

Full Stack Developer Dec 2024 – Present

Procuregenie – B2B Procurement Platform

- Took ownership of **migrating a legacy Spring Boot and JSP application** to a modern React (TypeScript) and Node.js stack, and now own new feature development on it.
- Delivered the **Vendor Management, Tenders, Approvals, Purchase Order (P.O.) and RFQ** modules across both the Java and MERN codebases.
- Cut page load times from **3.5s to 1s (~70% faster)** using pagination, caching, database query indexing and code splitting.
- Tested all APIs with Postman, wrote unit tests, and set up a **CI/CD pipeline**; worked with AWS, PostgreSQL (pgAdmin) and MongoDB.

PHP Developer Intern Jan 2024 – Jun 2024

v3cube Technolabs

- Built an admin **dashboard** and a complete **CRUD module** using PHP, JavaScript, HTML and CSS.
- Gained hands-on grounding in PHP, Java, HTML and core web development practices.

Python Developer Intern Sep 2023 – Dec 2023

Seawind Solutions

- Used **Python, NumPy and Pandas** for data analysis and data manipulation tasks.
- Worked within the **SDLC** and contributed to full-stack web development using Python.

PROJECTS

Climate Hazard Trend Analyzer | *React, Vite, FastAPI, MongoDB Atlas, Leaflet, Chart.js*

- Built and deployed (Vercel + Render) a full-stack app that detects heatwave events using a **WMO 1991–2020 baseline** and day-of-year 95th-percentile thresholds.
- Implemented **OLS regression and Mann-Kendall trend tests**, with strict gap handling that excludes years with over 10% missing data.
- Added MongoDB Atlas caching, rate limiting, an interactive Leaflet map and CSV export; cached responses return in **under 500ms**.

Facial Recognition Attendance System | *Python, OpenCV, FastAPI, Next.js, PostgreSQL*

- Built a real-time biometric attendance pipeline with OpenCV, reaching **99.8% matching accuracy** on a tested dataset.
- Developed a **FastAPI backend** logging clock-ins to PostgreSQL within milliseconds, preventing proxy check-ins; built a live admin monitor in Next.js.

AI Service – Custom Prompt & LLM Integration Platform | *Next.js, Python, OpenAI API, REST, Microservices*

- Architected a centralized microservice for LLM calls shared by multiple web apps, with **prompt versioning** so prompts update without client code changes.
- Built REST endpoints with middleware for **token-usage tracking and rate limiting**; added caching and request pooling to cut latency and API cost.

TodoChimp – Task Management & Progress System | *React, Node.js, Express, PostgreSQL, Tailwind CSS*

- Architected a **multi-user task management and delegation platform** for cross-team execution, with a centralized activity log tracking every assignment and status change.
- Developed **role-based state routing** with live indicators ("Assigned to You", "In Review", "Pending") for managers and developers.
- Built an **analytics dashboard** showing completion statistics across frontend, backend and QA stages to surface pipeline blockages.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, PHP, SQL

Frontend: React.js, Next.js, Vite, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express, FastAPI, Spring Boot, JSP, REST APIs, Microservices

Databases: PostgreSQL, MongoDB, pgAdmin

Tools & Cloud: Git, GitHub, Postman, AWS, CI/CD, Unit Testing, Vercel, Render, VS Code

Data: NumPy, Pandas

Core Concepts: Data Structures & Algorithms, System Design, SDLC, Agile

EDUCATION

SAL College of Engineering 2021 – 2024

Bachelor of Engineering, Computer Engineering; CGPA: 8.0

L.J. University 2019 – 2021

Diploma, Computer Engineering; CGPA: 9.0

CERTIFICATIONS

- Data Analytics & Management – Google (Coursera)
- Data Visualization – Google (Coursera)
