

ABHAY GADHVI

FULL STACK DEVELOPER · 3+ YEARS EXPERIENCE

Ahmedabad, Gujarat, India | [+91 9099480268](tel:+919099480268) | gadhviabhay11@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Accomplished Full Stack Developer with 3+ years of overall experience engineering robust digital products, custom system architectures, and integrated database systems. Proficient in programming languages such as Python, PHP, CSS, React.js, Node.js, and Java, backed by a solid understanding of algorithms, data structures, and optimized backend systems. Demonstrates proven expertise in developing highly scalable software solutions, optimizing system performance, and troubleshooting complex technical bottlenecks with a track record of collaborative problem-solving and driving technological innovation in fast-paced teams.

SKILLS

Full Stack Development: React.js, Node.js, PHP, Python, Java, JavaScript (ES6+), HTML5, CSS3, Express

Databases & Storage: PostgreSQL, MongoDB, SQL Database Management, Data Modeling

Data Analysis & Visualization: NumPy, Pandas, Data Analytics, Data Visualization, Data Evaluation

Tools & Technologies: Git, GitHub, VS Code, Webpack, Vite, Command Line, npm

Methodologies & Competencies: System Design, Algorithms & Data Structures, Agile Development, Testing & Debugging

Collaboration & Soft Skills: Teamwork & Collaboration, Professional Communication, Collaborative Problem Solving

PROJECTS

1. Content Library for Website Development

Vite, React, Tailwind CSS, Lucide

- Engineered a highly optimized, fully searchable index of curated web development assets and UI kits with sub-millisecond filtering logic to expedite front-end developer discovery workflows.
- Designed a local bookmarking and resource-saving interface utilizing client-side state, facilitating instant layout organization.
- Implemented quality validation checks for catalog submissions, resulting in a premium, manually verified database of UI libraries, typography, animations, and icon resources.
- Structured a responsive, grid-based catalog interface highlighting specialized category tags to minimize bookmark clutter and enhance visual discovery.

2. Facial Recognition System for Attendance

Python, OpenCV, FastAPI, Next.js, PostgreSQL

- Designed and developed an automated real-time biometric attendance pipeline using advanced face detection models and the OpenCV library, achieving a matching accuracy of **99.8%**.
- Created a secure, high-throughput backend using Python and the FastAPI framework, allowing biometric arrivals and clock-in events to be logged to a PostgreSQL database within milliseconds.
- Substantially enhanced institutional attendance security and administrative efficiency by eliminating check-in fraud, manual entry errors, and credential sharing (buddy punching).
- Built real-time logging monitors and biometric scanning animations to provide immediate verification and live status feedback to system administrators.

3. TodoChimp – Task Management & Progress System

React, Node.js, Express, PostgreSQL, Tailwind

- Architected a multi-user task management and delegation platform using React, Node.js, Express, and PostgreSQL, facilitating seamless task delegation and cross-team execution.
- Engineered a centralized activity log compiling every workflow shift, assignment update, and task status into a single comprehensive action timeline to secure group accountability.
- Developed a robust state routing logic with real-time indicators ("Assigned to You", "In Review", "Pending") supporting distinct role permissions for managers and developers.
- Built an interactive analytics dashboard rendering completion statistics across frontend, backend, and QA stages to assist teams in managing pipeline blockages.

4. AI Service – Custom Prompt & AI Integration Platform	Next.js, Python, OpenAI API, REST APIs, microservices
- Architected a centralized, highly scalable microservice acting as a single source of truth for LLM interactions across sibling web applications, handling concurrent requests efficiently. - Designed a global prompt-versioning repository allowing complex developer prompts to be versioned and updated dynamically without client-side code modifications. - Built custom REST API endpoints (e.g. <code>/api/v1/generate`</code>) equipped with robust middleware for tracking token usage metrics (inputs/outputs) and enforcing API rate limits. - Implemented efficient caching and request pooling strategies to minimize API execution latency and lower operational LLM integration costs.	

WORK EXPERIENCE

1. Full Stack Developer	Ahmedabad, India
Procuregenie	12/2024 - Present (3+ Years Experience Combined)
- Designed and developed full-stack web applications to support procurement and workflow management processes. - Worked across frontend and backend systems to build scalable, maintainable, and responsive product features. - Collaborated with cross-functional stakeholders to understand customer requirements and translate them into effective technical solutions. - Improved existing application performance and codebase efficiency through active code optimization and feature enhancements. - Utilized modern development tools and frameworks to ensure extreme reliability, efficiency, and a smooth UX.	
2. PHP Developer – Intern	Ahmedabad, India
v3cube Technolabs	01/2024 - 06/2024 (6 Months)
- Developed and maintained backend web applications and admin panels using PHP, JavaScript, HTML, and CSS. - Identified critical areas of performance lag and workflow friction, narrowing focus to deliver highly strategic refactors. - Redesigned website frontends to enhance search navigation, clean up layout structure, and dramatically improve overall visual appeal.	
3. Python Developer – Intern	Ahmedabad, India
Seawind Solutions	09/2023 - 12/2023 (4 Months)
- Utilized core Python libraries such as NumPy and Pandas for data analysis, complex statistics calculations, and data manipulation tasks. - Identified client and technical team needs promptly, building targeted scripts that improved execution efficiency. - Contributed critical feature enhancements to active web applications using Python algorithms and script integrations.	

EDUCATION

1. Bachelor of Engineering in Computer Engineering	2021 - 2024
Sal College of Engineering	
2. Diploma of Computer Engineering	2019 - 2021
L.J. University	

CERTIFICATIONS

1. Data Analytics & Management	2. Data Visualization
Google Coursera	Google Coursera
3. Digital Marketing	4. Swaraj Quiz Certification
Government of India	Government of India
